

# APGC 600 dry propylene glycol

## 1.031.000 Supplementary feed for dairy cattle

### Properties

APGC 600 is an excellent source of energy, neutral of taste and very suitable to process in lactation start mix and mineral mixes.

APGC 600 can also be mixed in the TMR feed or top dressed.

### Ingredients

APGC 600 contains:  
60% 1,2 propanediol (propylene glycol)  
40% inert protein free carrier material (silicate)

energy value: 1146 VEM  
1320 VEVI

### Advantages

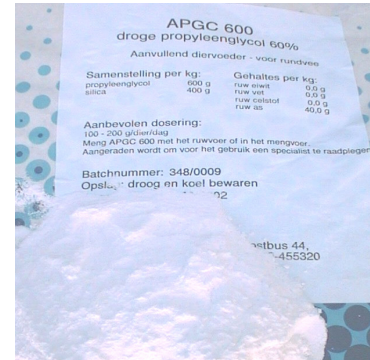

The use of APGC 600:

- a quick absorption
- high energy value
- neutral taste
- easy to mix with the feed.

### Directions of use

Cows: at the end of the dry period and the first week of lactation: 200 g. APGC600 per cow and per day.

From 1 week after calving 100 - 150 g per cow per day

### Packaging

APGC 600 is packed in 25 kg bags.

### Storage

Keep it dry, out of reach of children and away from sunlight.

### Best before use date

APGC 600 is best before two years after the production date.
