

CalciMag Gel 300 ml

3.041.021 Supplementary feed for dairy cattle

Properties

A mineral feed for dairy cows around calving with good absorbable calcium, magnesium and cobalt. To meet the needs of fresh dairy cows.

The active nutrients are effective and safe and easy to give in a gel form. The gel form prevents spillage and losses.

Ingredients (per kg)

Calcium	145,0 g
Magnesium	3,1 g

Additives (per kg)

Sodium	1,8 g
Cobalt	1,4 g

Directions of use

At calving: 1 tube
If necessary a second tube 6 – 24 hours after the first one.

Packaging

1 tube contains 300 ml – 420 gram
6 tubes per box; 6 boxes per case.

Storage

Keep dry and cool, do not freeze, store out of reach of children and away from sunlight.

Best before use date

Cal Plus Gel is best before 2 years after the production date.
