

Fly catcher roll

3.413.004 fly catcher roll

Properties

The fly catcher roll is an environmental friendly, poison free, effective flycatcher. The very attractive bait and the represented flies make the roll irresistible. The flycatcher roll is extremely suitable for stables, milking parlours, stockholders and houses.

Active ingredients

Carbon resin and paraffin oil.

Direction of use

- Hang the roll on the ceiling or on a beam, the favourite place is a few metres away from a window or another source of light. The light reflects on the shined and sticky surface of the flycatcher roll and this helps to attract the flies. In very dusty areas the fly catcher can also hang horizontally with the shiny and sticky surface faced down.
- Roll of 20 cm to 1 metre, this is dependent of the quantity of flies. In horizontal position unroll up to 3 metres.
- When the unrolled part is full with flies, than cut this part away. Fold the end 3 cm double and unroll a fresh part of the roll.
- When the end (3 cm) is folded down, it is easy to unroll the flycatcher further without sticky fingers.

Advantages

- Poison free
- Environmentally friendly
- Natural lure and glue
- No resistance
- Easy to install with help of a hanger
- Very effective

Measurements

Complete rolled on the fly catcher is 30 cm x 9 metre.

Packaging

24 fly catcher rolls and 24 loose hangers per box.
