

# Easy-Light

## Stable Lighting

Easy-Light are metalhalogen and LED lamps named Asy Flood and Asy Led. These lamps have several advantages in comparison to orange natrium lamps. With these lamps, it is easier to see and observe your cows. These lamps also provide in the need of light for cows. This creates a higher level of Cow Comfort.

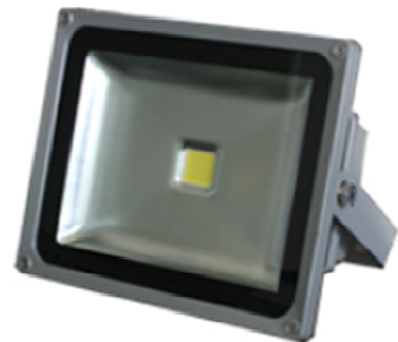

Easy-Light has a lot to offer:

### Advantages

- ⇒ Cows show that they are in heat faster because of good lighting.
- ⇒ Pleasant color of the light.
- ⇒ Much better light-reproduction.
- ⇒ The lamps are not too bright for the cows.
- ⇒ Enough light stimulates the milk production.
- ⇒ Wide range in metalhalogen and LED.

### Usage

Easy-Light lamps are extremely suitable for the use in free stall barns. Both for cows as for young stock. For cows, light is of essential concern. This is because of the Melatonin hormone. The cows production of this hormone depends on the amount and type of light. The less or worse the light is, the more cows produce this hormone, which effects the milk-production negatively. The difference in milk-yield will be between 5 and 10 percent.

### Technical Data:

We have several armatures in our range. Amongst others:

Type armatuur	Type lamp	Lampvoet	Netspanning	Vermogen
ASY FLOOD 150W HPI-T PLUS	150W	E 40	230 V	-
ASY FLOOD 250W HPI-T PLUS	250W	E 40	230 V	278.0W
ASY FLOOD 250W SON-T PRO	250W	E 40	230 V	327.0W
ASY FLOOD 400W SON-T PRO	400W	E 40	230 V	484.0W
ASY LED	10W	E 40	230 V	50.0W
ASY LED	40W	E 40	230 V	150.0W

### Material:

The housing of the Asy Flood lamps is made of casted aluminium en spraypainted in RAL 9007 (silver grey). The armature house is IP65 (resistant against dust and water) and suitable for metal halogen lamps of 250W and 400W. The reflector is made of hammerprofile aluminium and gives an asymmetrical effect, so an effective exposure is possible.
