

Dermafoam

Hygiene & uddercare

Specially designed for pre-dipping. Thick and dense foam for maximum gripping effect on the skin. Very soft to the skin. Easy and fast application. Economical application: optimal product quantity is applied on the teat.

Direction of use

- Use a bubbling dip cup.
- Pour 50 ml of Dermafoam in the dip cup.
- Add 250 ml of water.
- Mix gently.
- Gently squeeze the dip cup so that the foam fills up the cup and goes above the upper level.
- Dip the teats.
- Clean the teat with a single use towel.
- Turn the towel on the other side and remove any excess of product on the teat.
- Connect the milking machine.
