

CalciMag Gel

Feed supplements

A mineral feed for calving dairy cows, with good absorbable calcium, magnesium and cobalt. Made to meet the needs of fresh dairy cows. The active nutrients are effective, safe and easy to give in gel form. The gel form also prevents spillage and losses.

Advantages

- Fast
- Effective

Storage

Keep it dry and cool, out of reach of children and away from sunlight.

Directions of use

At calving: 1 tube

If necessary a second tube 6 – 24 hours after the first one. or 8-12 hours after intravenous treatment.

The cow must have a swallowing reflex. Care must be taken when administering so the product does not enter the trachea and lungs. This can result in severe pneumonia.

Ingredients

Crude protein 0,6%, Crude fiber 0,1%, Crude ash 40,4%, Calcium 145g, Magnesium 3,1g, Sodium 1,8g, Cobalt 1,4g
