

MAMMOUTH Cow mattress - Energetic® Ecolatex system

Solid and durable

The Mammouth cow mattress

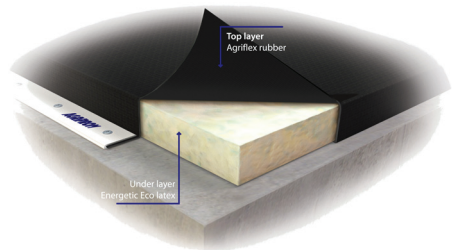

- ③ Remains elastic and does not deform.
- ③ Is very durable and reliable.
- ③ The mat is not slippery.
- ③ Cows stand up easier
- ③ Easy to clean
- ③ Almost no need for sawdust
- ③ Labor-saving

8mm Topmat of 100% natural rubber

The top-cover of the Mammouth mattress is made of 100% natural rubber. The rubber is reinforced by a nylon layer so the mat remains its size no matter what temperature. It is a seamless and waterproof layer which provides better hygiene and easier cleaning. The thickness is 8mm which ensures a comfortable laying area with optimal grip because of its special hammer profile.

Energetic® Ecolatex underlayer

The Agriflex cow mattress has a Energetic® EcoLatex under layer which is made of 100% latex. The sheets of Energetic® Ecolatex consist of natural rubber with a very high elasticity level. The memory of the ecolatex assures life long comfort and flexibility for your cows. No other material comes close to the flexibility and durability of our Energetic® EcoLatex. Our product is water repellent and has a anti-fungal and anti-bacterial effect.
